HT-S400

WARNING

Do not install the speaker system in a confined space, such as a bookcase or built-in cabinet.

To reduce the risk of fire, do not cover the ventilation opening of the speaker system with newspapers, tablecloths, curtains, etc. Do not expose the speaker system to naked flame sources (for example, lighted candles).

To reduce the risk of fire or electric shock, do not expose this speaker system to dripping or splashing, and do not place objects filled with liquids, such as vases, on the speaker

The speaker system is not disconnected from the mains as long as it is connected to the AC outlet, even if the speaker system itself has been turned off.

As the mains plug is used to disconnect the speaker system from the mains, connect the speaker system to an easily accessible AC outlet. Should you notice an abnormality in the speaker system, disconnect the mains plug from the AC outlet immediately

Risk of explosion if the battery is replaced by

CAUTION

an incorrect type. Do not expose batteries or appliances with battery-installed to excessive heat, such as sunshine and fire.

Do not place this product close to medical devices.

This product (including accessories) has magnet(s) which may interfere with pacemakers, programmable shunt valves for hydrocephalus treatment, or other medical devices. Do not place this product close to persons who use such medical devices. Consult your doctor before using this product if you use any such medical device.

Indoor use only

Recommended cables

Properly shielded and grounded cables and connectors must be used for connection to host computers and/or peripherals.

For the bar speaker

Setting	Explanation	
[N.ON]	Sound is output at low volume with minimum loss of fidelity and clarity of dialog.	
[N.OFF]	Deactivates the night mode function.	

When you turn the speaker system off, this setting is set to [N.OFF] automatically.

Using the Speaker System by Interlocking with a TV

Operating the Speaker System by Interlocking with a TV (Control for HDMI Function)

Connecting a TV compatible with the Control for HDMI function using an HDMI cable enables you to interlock the speaker system operation such as power on/off or volume adjustment with a TV.

About the Control for HDMI function

The Control for HDMI function is a function that enables operation of devices connected with an HDMI (High-Definition Multimedia Interface) cable by interlocking them. Although this function works for devices

compatible with the Control for HDMI function, it may not work if connecting devices other than those manufactured by Sony.

Preparing to Operate by Interlocking with a TV Enable the Control for HDMI function settings of

the TV connected to the speaker system with an HDMI cable The default setting of the Control for HDMI function of the speaker system is [ON].

• When connecting a device such as a Blu-ray Disc player to a TV with an HDMI cable, enable its Control for HDMI function. • To enable the Control for HDMI function of a TV or Blu-ray Disc player, refer to their operating instructions

 If you enable the Control for HDMI ("BRAVIA" sync) function when using a TV manufactured by Sony, the Control for HDMI function of the speaker system is also enabled automatically. When the setting is complete, [DONE] appears in the front panel display

Performing Power Operation or Volume Adjustment by a TV Remote Control

Troubleshooting

If the speaker system does not work properly, handle it in the following order

1 Search for the cause and solution of the issue using this troubleshooting.

2 Reset the speaker system. All the settings of the speaker system return to their initial status. For details, see "Resetting the Speaker System.'

Should any problems persist, consult your nearest Sony dealer.

Power

The speaker system does not power up. Check that the AC power cord (mains lead) is

connected securely. • Disconnect the AC power cord (mains lead) from the wall outlet (mains) and then reconnect after several minutes.

The speaker system is turned off automatically.

• The auto standby function is working. Press and hold \bigcirc (power) and \bigcirc (TV) on the bar speaker for more than 5 seconds to display [AUTO STANDBY] in the front panel display, then press ∠ (volume) +/- on the remote control to display [OFF] in the front panel display.

The speaker system does not turn on even when the TV is turned on.

• Set the Control for HDMI function to on. Press and hold VOICE on the remote control for more than 5 seconds to display [CONTROL FOR HDMI] in the front panel display, then press (volume) +/- on the remote control to display ON] in the front panel display The TV must support the Control for HDMI function. For details, refer to the operating instructions of your TV.

• Check the speaker settings of the TV. The

speaker system power syncs with the speaker settings of the TV. For details, refer to the operating instructions of your TV. • Depending on the TV, if the sound was output

from the speakers of the TV the previous time, the speaker system may not turn on by interlocking with the TV power even when the TV is turned on

The speaker system turns off when the TV is turned off.

• Check the setting of the Control for HDMI function by pressing and holding VOICE on the remote control for more than 5 seconds to display [CONTROL FOR HDMI] in the front panel display. To change the setting, press (volume) +/- on the remote control. When the Control for HDMI function is set to on and the input of the speaker system is the TV input, the speaker system turns off automatically when you turn off

The speaker system does not turn off even when the TV is turned off.

• Check the setting of the Control for HDMI function by pressing and holding VOICE on the remote control for more than 5 seconds to display [CONTROL FOR HDMI] in the front panel display. To change the setting, press 🗷 (volume) +/- on the remote control. When you turn off the TV, the speaker system turns off automatically only if the input of the speaker system is the TV input. The TV must support the Control for HDMI function. For details, refer to the operating instructions of your TV.

Picture

There is no picture or the picture is not output correctly. • When there is no picture while TV input is

selected, select the TV channel that you want using the TV remote control.

Sound

TV with the BLUETOOTH function. When you connect the speaker system and TV

with an HDMI cable (not supplied), the BLUETOOTH connection is canceled. Disconnect the HDMI cable, then perform the connecting operation from the start

The speaker system cannot connect to a

No TV sound is output from the speaker system.

 Check the type and connection of the HDMI cable or optical digital cable that is connected to the speaker system and the TV (refer to the supplied Startup Guide). • Disconnect the cables that are connected

between the TV and the speaker system, then connect them firmly again. Disconnect the AC power cords of the TV and the speaker system from the AC outlets (mains), then connect them

 When the speaker system and TV are connected with an HDMI cable only, check the following. The HDMI jack of the connected TV is labeled

with "ARC.

The Control for HDMI function of the TV is set

 On the speaker system, the Control for HDMI function is set to on. Press and hold VOICE on the remote control for more than 5 seconds to display [CONTROL FOR HDMI] in the front

panel display, then press ∠ (volume) +/- on the remote control to display [ON] in the front panel display. • If your TV is not compatible with ARC, connect the optical digital cable (supplied) (refer to the

supplied Startup Guide). If the TV is not compatible with ARC, TV sound will not be output from the speaker system even if the speaker system is connected to the TV's HDMI IN

 Select the TV input by pressing INPUT. • Increase the volume on the TV or cancel muting.

• Depending on the order in which you turn on the TV and the speaker system, the speaker system may be muted. If this happens, turn on the TV first, then the speaker system.

• Set the speakers setting of the TV (BRAVIA) to Audio System. Refer to the operating instructions of your TV regarding how to set the

• Check the sound output of the TV. Refer to the operating instructions of the TV for the TV settings • The speaker system supports the Dolby Digital

and PCM audio formats. When you playback an unsupported format, set the digital audio out setting of the TV (BRAVIA) to "PCM." For details, refer to the operating instructions of your TV.

The sound is output from both the speaker system and the TV. • Change the audio output setting of the TV so

that the TV sound is output from the external speaker • Set the TV volume to minimum.

The output sound of the speaker system is not the same level as that of the TV even though the values of the volume level on the speaker system and TV are set to the same value.

• If the Control for HDMI function is set to on, the value of the volume level on the speaker system may appear on your TV as the TV volume. The output sound levels of the speaker system and TV differ even though the values of the volume level on the speaker system and TV are set to the same value. The output sound levels of the speaker system and TV differ depending on the sound processing characteristics of each, and it

The surround effect cannot be obtained. • Depending on the input signal and the sound

field setting, surround sound processing may not work effectively. The surround effect may be subtle, depending on the program or disc.

is not a malfunction.

• To play multi channel audio, check the digital audio output setting on the device connected to

the speaker system. For details, refer to the operating instructions of the connected device.

No sound or only very low-level sound is

 Press BASS + on the remote control to increase the subwoofer volume • Make sure that the power indicator on the

subwoofer is lit in green or amber.

 Make sure the AC power cord (mains lead) of the subwoofer is connected properly - Press \odot (power) of the subwoofer to turn on

• If the power indicator on the subwoofer lights in red, try the following. Move the subwoofer to a location near the bar.

speaker so that the power indicator on the subwoofer lights in green or amber. Follow the steps in "Connecting the

Subwoofer Manually." • If the power indicator on the subwoofer flashes in red, press (b) (power) of the subwoofer to turn

off the power and check whether the ventilation holes of the subwoofer is blocked or not. • If the input sources contain very little bass sound components (i.e., a TV broadcast), the sound

from the subwoofer may be difficult to hear. Play the built-in demonstration music by following the steps below and check that the sound is output from the subwoofer \bigcirc Press and hold \bigcirc (TV) on the bar speaker for 5 seconds

The built-in demonstration music is played. ② Press □ (TV) again.

The built-in demonstration music is canceled and the speaker system returns to TV input. Set the night mode to off by pressing NIGHT.

BASS +/- does not work and [NOT USE] appears in the front panel display. • BASS +/- does not work when the subwoofer is

not connected. Check the power and connection status of the subwoofer

Mobile Device Connection **BLUETOOTH** connection cannot be

completed. • Make sure that the BLUETOOTH indicator on the bar speaker is lit

• Make sure the BLUETOOTH device to be connected is turned on and the BLUETOOTH function is enabled

Bring the BLUETOOTH device close to the bar

• Pair the speaker system and the BLUETOOTH device again. You may need to cancel the pairing with the speaker system using your BLUETOOTH device first.

• If the BLUETOOTH function is set to off, set it to on. To change the BLUETOOTH function setting, press and hold (power) and (BLUETOOTH) on the bar speaker for more than 5 seconds (the changed setting appears in the front panel

• Bring the BLUETOOTH device close to the bar

Pairing cannot be achieved.

• Make sure the speaker system is not receiving interference from a wireless LAN device, other 2.4 GHz wireless devices, or a microwave oven. If a device that generates electromagnetic radiation is nearby, move the device away from the speaker system • Pairing may not be possible if other BLUETOOTH

devices are present around the speaker system.

speaker system. • Make sure that the BLUETOOTH indicator on the

bar speaker is lit

• Bring the BLUETOOTH device close to the bar speaker.

• If a device that generates electromagnetic adiation, such as a wireless LAN device, other BLUFTOOTH devices or a microwave oven is nearby, move the device away from the speaker

• Remove any obstacle between the bar speaker and the BLUETOOTH device or move the bar

speaker away from the obstacle.

• If the bar speaker is installed under the TV, move the bar speaker away from the TV.

• Reposition the connected BLUETOOTH device. • Switch the wireless LAN frequency of any nearby wireless LAN router or PC to 5 GHz range.

BLUETOOTH device. The sound is not in sync with the image. When you are watching movies, you may hear

the sound with a slight delay from the image. Remote Control

• Increase the volume on the connected

The remote control of the speaker system does not function

• Point the remote control at the remote control

sensor on the bar speaker.

• Remove any obstacles in the path between the remote control and the speaker system.

• Replace both batteries in the remote control with new ones, if they are weak

 Make sure you are pressing the correct button on the remote control.

The TV remote control does not work.

• Install the bar speaker so that it does not obstruct the remote control sensor of the TV. This problem might be solved by enabling the IR

repeater function. Press and hold **\$** (BLUETOOTH) and − (volume) on the bar speaker for more than 5 seconds to display [IR REPEATER] in the front panel display, then press ∠ (volume) +/- on the remote control to display [ON] in the front panel display.

Others

work properly.

The Control for HDMI function does not

• Check the connection with the speaker system (refer to the supplied Startup Guide). • Enable the Control for HDMI function on the TV.

For details, refer to the operating instructions of your TV • Wait a while, and then try again. If you unplug the speaker system, it will take a while before

operations can be made. Wait for 15 seconds or longer, and then try again. Make sure the TV connected to the speaker system supports the Control for HDMI function.

• The type and number of devices that can be controlled by the Control for HDMI function is restricted by the HDMI CEC standard as follows: - Recording devices (Blu-ray Disc recorder, DVD recorder, etc.): up to 3 devices

 Playback devices (Blu-ray Disc player, DVD) player, etc.): up to 3 devices Tuner-related devices: up to 4 devices Audio system (receiver/headphone): up to 1 device (used by the speaker system)

[PROTECT] is scrolled in the front panel

display, then the speaker system is turned

off after 5 seconds. The protection feature is activated. Disconnect the AC power cord (mains lead) and make sure that the ventilations of the har speaker are not

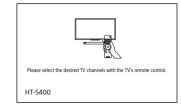

covered and turn on the speaker system after a Sensors of the TV do not work properly. • The bar speaker may block some sensors (such

as the brightness sensor), the remote control sensor of your TV or the emitter for 3D glasses (infrared transmission) of a 3D TV that supports the infrared 3D glass system, or wireless communication. Move the bar speaker away from the TV within a range that allows those parts to operate properly. For the locations of the sensors and remote control receiver, refer to the operating instructions of the TV.

The speaker system does not work

• The speaker system may be in demo mode. To cancel demo mode, reset the speaker system. Press and hold (power) and – (volume) on the bar speaker for more than 5 seconds.

The following message appears.

* This screen is an example for English Select the TV program by using the TV remote

[RESET] appears in the front panel display, and the settings return to their initial status.

2 Disconnect the AC power cord (mains lead).

press () (power) to turn on the speaker

On BLUETOOTH Communication

 BLUETOOTH devices should be used within approximately 10 meters (33 feet) (unobstructed distance) of each other. The effective communication range may become shorter under the following conditions. When a person, metal object, wall or other

obstruction is between the devices with a BLUETOOTH connection Locations where a wireless LAN is installed Around microwave ovens that are in use

Locations where other electromagnetic waves

 BLUETOOTH devices and wireless LAN (IEEE 802.11b/g/n) use the same frequency band (2.4 GHz). When using your BLUETOOTH device near a device with wireless LAN capability, electromagnetic interference may occur. This could result in lower data transfer rates, noise, or inability to connect. If this happens, try the following remedies: Use this speaker system at least 10 meters (33)

feet) away from the wireless LAN device. Turn off the power to the wireless LAN device when using your BLUETOOTH device within 10 Install this speaker system and BLUETOOTH device as closer to each other as possible.
