

# PHILIPS

## Philips Hue wall switch module

Hue

Installs behind an existing light switch

Customised scene selection

Control Hue lights with an existing switch

8719514318045

## Easy smart lighting

Installed behind light switches, the Philips Hue wall switch module lets you use existing switches with your Philips Hue smart lights. Your lights always stay powered on and reachable – and you can even use the switch to set multiple scenes on an individual light or in a Room or Zone.

### Personal scene setting

- Control lights, rooms or zones
- Cycle through scenes by toggling the light switch

### Full control from a smart device with the Hue bridge

- Hue Bridge required

### Always connected to power

- Ensures that your smart lights are always connected to power

# Highlights

## Control lights, rooms or zones

Use your existing light switch to control the smart lights in a Room or Zone. Simply set up the wall switch module with the lights you'd like it to control in the Hue app.

## Cycle through scenes by toggling the light switch

Use your switch to set up to three different light scenes – just toggle the switch on and off to cycle through the scenes you choose.

## Hue Bridge required

The Philips Hue wall switch module requires a Hue Bridge (sold separately). The Hue Bridge also allows you to add up to 50 lights and 12 accessories throughout your entire home, create timers and routines, and control your lights from anywhere – inside or outside your home – with the Hue app.

## Ensures that your smart lights are always connected to power

Never let your smart lights become 'unreachable' when someone uses the standard light switch to turn off the lights. With the wall switch module, your lights are always connected to power.

# Specifications

## Design and finishing

- Colour: white
- Material: plastic

## Environmental

- Operational humidity: 0%<H<80% (non-condensing)
- Operational temperature: 0 °C - 35 °C
