REVAMP YOUR PC

Give your opponents no chance and use your computer to its maximum potential. Designed for gamers and professionals, IRDM RGB DDR4 memory modules with LED lighting are a guarantee of extraordinary performance and visual effects tailored to your computer setup.

MODULE FREQUENCY:
3600 MHz

MODULE LATENCY:
18-22-22

COMPATIBLE WITH MOTHERBOARDS

Enthusiasts value performance, but they also appreciate it if performance goes hand in hand with design. That's why each module is equipped with 8 LEDs. The latest IRDM memory modules are compatible with RGB lighting control software from leading motherboard manufacturers such as ASUS, MSI, GIGABYTE, and ASRock. Program the colors the way you want and enjoy the impressive visual effects.

MODULES READY FOR ANYTHING

With carefully selected and tested memory components and a frequency of 3600MHz, you can enjoy stable and fast module performance whether your computer is used for gaming, content creation, or online streaming.

BEST QUALITY COMPONENTS

LIFETIME WARRANTY

XMP PROFILE SUPPORT

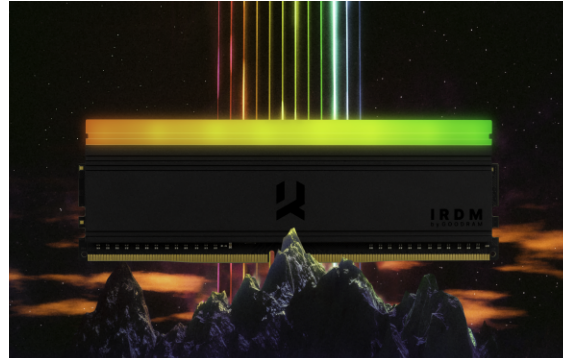

IRDM RGB modules work with XMP profiles and are compatible with AMD Ryzen processors, which makes it possible to set memory parameters according to your preferences and enjoy the power offered by the first RGB modules from the Polish manufacturer.

FULL MANUFACTURER SUPPORT

IRDM brand is distinguished by the uncompromising quality and modern solutions created with professionals and gamers in mind. RGB memory modules are no different. You can count on technical support and lifetime warranty. Each memory module coming off the production line of the Polish manufacturer is subjected to the most demanding tests. All this is done so that the product you hold in your hand can provide the quality you expect.

DURABLE HEATSINK

The black heatsink, constructed from a combination of aluminum, silicon, and magnesium, impresses with its durability and can easily handle the temperature inside your machine. The timeless design will appeal to even the most demanding users.

IRDM - SOLUTIONS FOR PROFESSIONALS

IRDM is a memory line for those who expect the best workmanship, durability, interesting design, and excellent parameters of their equipment. IRDM modules, drives, and cards are dedicated for all those who need the highest quality products for their work or hobby. Potential customers of the brand's products are professional photographers, engineers, programmers, filmmakers, as well as extreme sports, video games, e-sport, or modding enthusiasts. Although they each perform their tasks differently, they need the right,

efficient, and reliable tools to get the job done. Explore the range and discover high-speed SSDs with M.2 and 2.5" form factors, as well as memory cards that perform with the highest precision even under extreme conditions. If you value minimalism, opt for IRDM PRO DDR4 modules which are available in three modern color versions: Deep Black, Hollow White, and Pitch Black. Enter the world of IRDM and benefit from the solutions at the highest level.
